PABLO NUDEL FULLSTACK DEVELOPER

Designer and Art Director for 15 years, I now build modern web applications using React and Node.js. The common thread of my career: solving problems, structuring complex projects, and delivering tangible results. Currently completing an internship at LAAS-CNRS, I am available for a Fullstack Developer position.

LAST PROJECTS

AsyncFL-Boards

[NextJS](#) [React](#) [Typescript](#) [Postgres SQL](#) [Prisma](#) [Docker](#)

Web application for creating dashboards to visualize research results on asynchronous simulation optimization with Federated Learning.

Technical Achievements:

- Frontend: NextJS, React, TypeScript, Plotly (interactive visualizations).
- Backend: REST API, Motia, Auth, Slurm cluster integration.
- Database: PostgreSQL + Prisma.
- Features: Dashboard editor, file management, simulation launching.

*Under development (Internship at LAAS-CNRS, 09/2025 - 02/2026)

Vizboard

[NextJS](#) [React](#) [Typescript](#) [Postgres SQL](#) [Prisma](#) [Docker](#)

Platform for creating dashboards from multiple external database connections. Final project for professional certification RNCP Level 5.

Technical Achievements:

- Simultaneous connections to multiple databases with access encryption.
- Multi-protocol authentication (OAuth + native credentials).
- Dynamic schema introspection for agile dashboard generation.
- Modular widget library for content customization.
- Public/private sharing system with privacy controls.
