PABLO NUDEL

WEB & WEB MOBILE DEVELOPER

With a solid background in creative disciplines, project management, and client relations, I chose to pivot my career into web development. Currently interning at LAAS-CNRS, I am now open to new professional opportunities — whether an apprenticeship to further my specialization or a permanent position (CDI) — to contribute my skills to ambitious projects.

LAST PROJECTS

Vizboard NextJS React Typescript Postgres SQL Prisma Docker

Platform for creating dashboards based on external database connections. Final project for the Holberton School RNCP 5 (Web and Mobile Developer) certification.

Key project features:

- Authentication and authorization (OAuth and credentials).
- Creation of projects with multiple database connections.
- Database access encryption.
- Schema introspection for dynamic dashboard creation.
- Unified data table for multiple sources with the same structure.
- Widgets for creating data tables, charts, and text blocks.
- Widgets and dashboard layout configurations.
- Private or public dashboards with link generation for sharing.
- Internationalization (French and English).

HBnB Evolution Python Javascript SQL HTML CSS

A basic clone of the popular AirBnB platform, developed with a Flask-based backend and a simple web client, as part of the Holberton School curriculum.

- <https://github.com/pablonudel/holbertonschool-hbnb>

Simple Shell C

Basic shell made in C that reproduces some features of a standard UNIX shell. Project as part of my training at Holberton School.
