PABLO NUDEL
JR WEB DEVELOPER

After a career rich in experiences in various creative disciplines, as well as project and client management, I decided to retrain in web development. Currently, I am following an intensive training course at Holberton School, where I am developing my technical skills and deepening my knowledge in this exciting field.

LAST PROJECTS

Simple Shell   `C`
Basic shell made in C that reproduces some features of a standard UNIX shell.
Project as part of my training at Holberton School.
• *https://github.com/pablonudel/holbertonschool-simple_shell*

_prinf Function   `C`
A simplified version of the printf function in C.
Project as part of my training at Holberton School.
• *https://github.com/pablonudel/holbertonschool-printf*

ThreeJS Projects   `ThreeJS` `React` `Javascript`
Projects completed as part of the course on threejs-journey.com
• **EarthShaders** : https://github.com/pablonudel/EarthShaders
• **AnimatedGalaxy** : https://github.com/pablonudel/AnimatedGalaxy

Backend Store   `ExpressJS` `MongoDB` `PassportJS` `Swagger`
A backend for an e-commerce developed with ExpressJS, MongoDB and documented using Swagger. This project is part of a final course project at Coderhouse.
• *https://github.com/pablonudel/ecommerce_backend*

Electric Wheels   `ReactJS` `Firebase`
E-commerce platform for the sale of electric scooters, bicycles and accessories.
This project was developed as part of the React course at Coderhouse.
• https://github.com/pablonudel/ecomm-reactjs

BelleBière   `Html` `SCSS` `Javascript`
A fake online store that sells a variety of beers and beer-related accessories.
This project is part of a final course project at Coderhouse.
• *https://github.com/pablonudel/bellebiere*

Inkemall   `Html` `SCSS` `Javascript`
This project is part of the final course project at Coderhouse, showcasing a fully functional website for a fictional tattoo studio.
• *https://github.com/pablonudel/inkemall*
